

Task Questionnaire

Start of Block: Introduction

Task Questionnaire After completing the initial policy generation task using AGentV, answer the following questions based on the generated policies.

IMPORTANT: If you generate a policy, don't forget to "Publish" it to AGentV's internal database before sending access requests to test the policies or visualize them. **IMPORTANT:** AGentV is operating under the **Default Deny** principle. It uses, **Deny Overrides** policy combining algorithm to resolve conflicts between access control policies. **First Applicable** rule combining algorithm to resolve conflicts between access control rules

Start of Block: Questions

Question: Generate a policy allowing MHP to view test results and the personal representative to modify patient demographic data. Publish **all** the generated **Access Control Policies** to AGentV's internal database and confirm whether the policy is applied.

Page Break

Question: Can the LT view patient demographic data?

☐ Yes (1)

☐ No (2)

Question: Please allow LT to view patient demographic data.

Page Break

Question: Can the administrator view full medical records?

☐ Yes (1)

☐ No (2)

Page Break

HCP is already allowed to view patient demographic data. Now, Question: Restrict HCP from viewing patient demographic data.

Remember: AGentV is operating under the **Default Deny** principle. It uses **Deny Overrides** policy combining algorithm to resolve conflicts between access control policies. By restricting HCP represents LHCP, MHP, LT, DLHCP, and UAP.

Page Break

Question: Can the LT now view patient demographic data?

☐ Yes (1)

☐ No (2)

Page Break

Question: Allow LHCP to view patient demographic data. **Remember:** AGentV is operating under the Default Deny principle. It uses Deny Overrides policy combining algorithm to resolve conflicts between access control policies. **Hint:** LHCP is an HCP (i.e., LHCP falls under the role of HCP according to the Organization Hierarchy).

Page Break

Question: Can LT view patient demographic data now?

☐ Yes (1)

☐ No (2)

Question: Can LHCP view patient demographic data now?

☐ Yes (1)

☐ No (2)
